

Noise Assessment

WATTA WELLA RENEWABLE ENERGY PROJECT

- A noise assessment has been undertaken in accordance with the Victorian guidelines for wind energy development.
- The operational noise at non-associated landowners should not exceed 40 dB(A) or 5 dB(A) above the background noise level (whichever is higher).
- Typically, an operational noise limit of 45 dB(A) or 5 dB(A) above the background noise level (whichever is higher) is applied for associated landowners.
- A typical living room is 40 dB(A).
